

Job Name: _____
Purchaser: _____
Engineer: _____
Submitted To: _____
Submitted By: _____
Unit Designation: Schedule No.: _____

Location: _____
P.O. No.: _____
Architect: _____
Date: _____
For: ☐ Reference ☐ Approval ☐ Construction
Model No.: _____

Submittal Data: EA PTAC

Standard Features:

Standard Warranty:

- One Year Full System Comprehensive Parts and Labor.
- 2nd to 6th Year Sealed Refrigerant System Parts Including Compressor.
- Shipping of Parts is covered to any location in North America during warranty period.

Optional Extended Six Year Warranty (Includes Standard Warranty Plus):

- 2nd to 6th Year Sealed Refrigerant System Labor.
- 2nd to 6th Year Comprehensive Parts Including Shipping Costs.

R-410A Refrigerant

High Static Pressure Blower Designs superior for ducted and hydronic applications.

UL Category 1 Components.

High Energy Efficiency.

Ultra Quiet Operation.

Chassis configured as exact fit to original EA sleeve, original EA top grille, and original EA front cover.

Combination room cabinet and wall sleeve is constructed of heavy-gauge, zinc-coated phosphatized steel. Powder paint finish provides maximum corrosion protection. Through the wall dimension of only 16 3/8" x 44 7/8".

Discharge grilles are powder-coated.

Front Cover is a unique double insulated panel design, with four-way room air return around its periphery. This unique design permits flat-on-the-floor installation. The Front Panel is constructed of heavy-gauge zinc-coated phosphatized steel, with powder-coated paint finish. Each of the panels is insulated for unmatched sound suppression.

Digital Control Display (optional Mechanical Control available)

Blue Fin Anti-corrosion Treatment for Condenser

Welded heavy-gauge aluminum evaporator pan.

Easy Connection to Wall Thermostats, Energy Management Systems, or Front Desk Control (electronic chassis)

Freeze Room Protection (electronic chassis)

Dip Switch setting for temperature limiting (electronic chassis)

Temperature Display on Chassis (electronic chassis)

Engineered and Manufactured In North America in a CSA inspected and approved facility.

CSA safety approved and 3rd Party ETL laboratory energy performance verification tested.

Manufacturing & Quality Assurance Process:

All Applied Comfort PTACs undergo the following uniquely rigorous manufacturing & QA process:

- STEP 1) Sealed System Pressure Test -- The completed sealed system is subjected to a high PSI dry air pressure test. Each PTAC is held at pressure and monitored for pressure decay to ensure the sealed-system free of any leaks.
- STEP 2) Vacuum Decay Test -- The sealed system is drawn down to ultra-low vacuum, and then evaluated according to a conservative vacuum decay algorithm for an extended period.
- STEP 3) Charge Algorithm Test (R410a) -- The sealed chassis is charged by an automated refrigerant charge station and held at charge for a defined period to monitor for leaks.
- STEP 4) Test Room 1 -- Full Dielectric Test, Ground Continuity Test, and Full Operational Test of All Chassis Functions in all heating and cooling modes.
- STEP 5) 20 Minute "Cool Down" -- All PTACs have a 20 minute cool-down period after Test Room 1 and before Test Room 2., during which time additional chassis components are added.
- STEP 6) Test Room 2 -- A second battery of tests including Dielectric Test, Control System Test, Full Operational Test of all chassis functions, Ambient Sound Test to detect any errant sound or vibration. When completed, a test record is digitally captured for future reference, and a paper record is affixed to the chassis.
- STEP 7) Final Visual Inspection and Packaging.

Note that Applied Comfort's manufacturing facility is qualified by and regularly inspected by CSA.

Safety Certification & Energy Verification Process:

Applied Comfort PTAC models are submitted to CSA laboratories for safety testing and safety certification. Following CSA certification, Applied Comfort PTAC models are submitted to ETL laboratories to undergo 3rd party energy performance verification and charge optimization/verification testing.

Combinaton Room Cabinet and Wall Sleeve,
with Room Cover and Top Grille Assembly

Accessories:

Wall Sleeve -- 44 7/8" (1140mm) wide x 16 3/8" (416mm) high x 20" (508mm) deep	ACCEAWALLSLEEVE
Room Front Cover -- Double Insulated -- 4-sided Air Return -- includes washable aluminum mesh filter	ACCEAFTCOVER_PREMIUM
Aluminum Architectural Grille -- Anodized Silver	ACCEAAAGRILLE_ANODIZED
Stamped Steel Powder-Coated Grille -- Beige	ACCEASSGRILLE_BEIGE
Stamped Steel Powder-Coated Grille -- Silver	ACCEASSGRILLE_SILVER
Sub Base -- Powder-Coated Black -- No Power	ACCEASUBBASE_NOPOWER
Sub Base -- Powder-Coated Black -- 20A 265V	ACCEASUBBASE_20A_265V
Sub Base -- Powder-Coated Black -- 30A 265V	ACCEASUBBASE_30A_265V

Thermostats:

WIRELESS Wall T'stat -- Up to 2 heat 2 cool conventional -- Up to 3 heat 2 cool heat pump -- <u>7 Day or 5/1/1 programmable</u> or non-programmable	ACCWIRELESST955W-1
WIRELESS Wall T'stat -- 1 Heat, 1 Cool (no Heatpump) -- <u>Non-Programmable</u>	ACCWIRELESST631W-2
WIRED Wall T'stat -- Single Stage -- 1 Heat, 1 Cool (no Heatpump) -- <u>5/1/1 Programmable</u>	ACCWIREDT605-2
WIRED Wall T'stat -- Single Stage -- 1 Heat, 1 Cool -- <u>Non-programmable</u>	ACCWIREDT601-2

Applied Comfort EA series PTAC
General Product Dimensional and Installation Drawings

Proper building practices must be used when constructing a wall opening to support a PTAC wall sleeve and chassis.
If practices are unknown, consult your local architect or building contractor.
Product dimensions and attributes may change without notice. Contact your Applied Comfort Representative for updates.

NOTE: ROOM COVER is 2 layer, zinc-coated, phospated-dipped, powder-coated steel.
Insulation is added to both layers of panel for optimized sound-deadening.

DESIGN NOTES:
Four-way air return around its periphery.
Design permits flat-on-the-floor installation.
Permanent, cleanable aluminum mesh filter mounted on reverse side of cover.
Hinging device permits full access to the heating-cooling chassis.
